

## Template installation instructions:

### The content of .zip archive:

- /templates folder
- /themes folder

### Unpacking and uploading template files to your Web Server

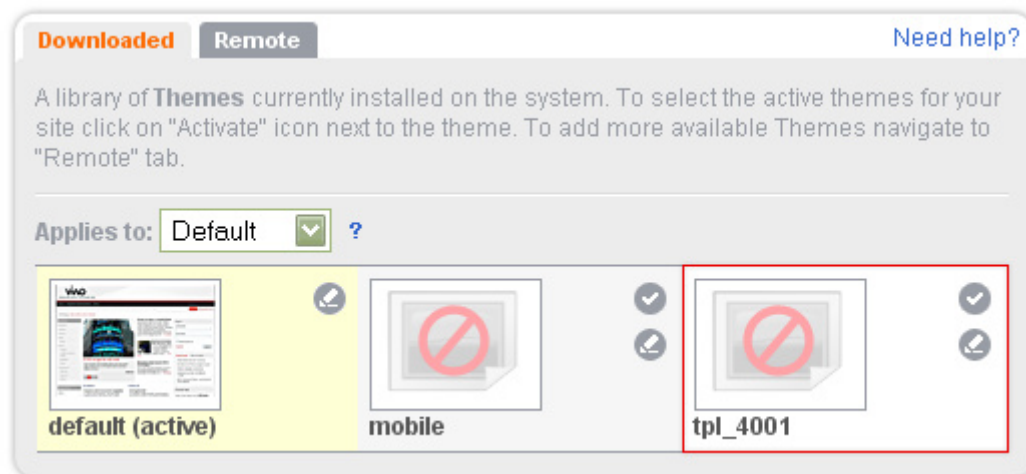

1. Unpack the content of the .zip file to your local disk.
2. Upload entire content via FTP program to the root folder on your Web Server, where your Vivvo website is located.

### Activating the template via Administration

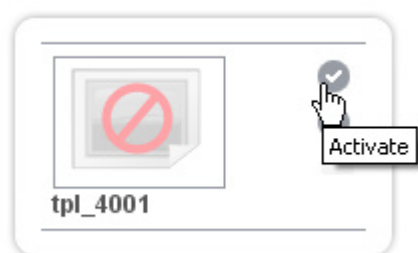

1. Log in to your Vivvo administration panel as described in User Manual ([http://wiki.vivvo.net/user\\_manual/login](http://wiki.vivvo.net/user_manual/login)), and click on the “Layout” section in main navigation.

2. On the “Downloaded” tab you will see the template set you just uploaded.

3. Enable the template set by clicking the “Activate” button.

4. When the browser asks you do you want to change the template set as well, click **ok**.
